>>> BACKGROUND

The International Conference on Climate Finance and Industry initiated to commemorate the launch of the GCF Secretariat in Songdo, Incheon, celebrates its 11th anniversary this year. In the last 10th conference, held in 2023, we discussed how to cooperate with climate finance and the next decade of the International Climate Finance Industry Conference with every stakeholder who has participated in the conference until now.

As the climate crisis and climate disasters become deeply intensified, the international community is continuously working on raising \$100 billion every year in climate finance to enhance the capability of developing country's response to climate crisis. GCF is continuously promoting financing through the second Replenishment period, and strategy to increase access to climate finance. Focusing on climate finance and fund, the 11th International Conference on Climate Finance and Industry will plan for various stakeholder to share their preparation and discuss methods for accomplishing global projects.

Beyond the regions and countries, we will further develop our conference into a representative international conference with expertise and sustainability in which the international community will work together to realize carbon neutrality and respond to the climate crisis effectively.

We look forward to your continued interest and participation in the 11th International Conference on Climate Finance and Industry.

Jeong-bok Yoo Mayor, Incheon Metropolitan City
Ho Goon Park President, Incheon Institute
